DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I (claims 1-15, 17 and 19-24) in the reply filed on 11/20/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 16 and 25-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/20/07.

Specification

CROSS-REFERENCE TO RELATED APPLICATION

3. This application is a 371 of PCT/JP05/03831 03/01/2005.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 19-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. Claim 19 is intended to recite a sequence of steps. The omitted steps are: the sequence of or the timing of addition of the organic acid/salt to the mixed solution of hydroxide

Art Unit: 1621

and sulfate/nitrate. It is unclear if the acid/salt is to be added to a first group then to a second group; or if the mixed solution is (a first group + a second group) to which acid/salt is added.

b) Claim 19 recites the limitation "the group" in lines 8 and 10. There are insufficient antecedent bases for these limitations in the claim.

Allowable Subject Matter

6. Claims 1-15 and 17 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art, of record, including Hideyuki et al. (JP2000-007326, JP'326 in IDS) neither teach nor suggest the organic acid anion containing aluminum salt hydroxide particles, represented by general formula (I) in claim 1.
